

## **PRESS RELEASE**

**EMBARGOED JUNE 27 2006**

### **NEUXPOWER SOLUTIONS LAUNCHES NEW VERSIONS OF NXPOWERLITE AT C3 EXPO**

#### **Presentation Compression Tool Now Available in both Server and Desktop Editions**

**New York, June 27 2006** - Neuxpower Solutions (exhibit booth #4104) today announced a new Server Edition of NXPowerLite, a presentation compression tool, at C3 Expo.

NXPowerLite radically reduces the size of Microsoft® PowerPoint® presentations (as well as StarOffice® and OpenOffice.org presentations saved in the PowerPoint format) by compressing the graphics and embedded documents contained within them, making them easier to manage, distribute and use.

NXPowerLite can reduce the size of presentation files by as much as 95% with no discernible loss of quality. Compressed presentations retain the PowerPoint® format and remain fully editable by anybody with a copy of PowerPoint®. The recipient requires no special viewers or plug-ins.

NXPowerLite Server Edition is an industry-first for this type of product, allowing organizations to deploy NXPowerLite in a way that exactly matches their requirements and is seamless to end-users. Once configured, it will enable IT managers to immediately improve network efficiency and performance, while reducing backup requirements and shortening backup windows. The Server Edition can be scripted from any environment that supports COM components (such as ASP or Windows® Scripting Host).

Mike Power, Neuxpower Managing Director, commented: "After the phenomenal reception that the desktop version of NXPowerLite has received from the IT community, we are delighted to be able to take the concept a step further. The Server Edition of NXPowerLite will help businesses to drastically reduce their storage and bandwidth costs, IT support overheads and employee frustrations, all in a manner that is virtually invisible to the user."

Today also saw the launch of a new desktop version of NXPowerLite which includes a batch-processing feature that will allow users to instantly reclaim large amounts of disk space. NXPowerLite 2.3 is available as free upgrade for existing NXPowerLite 2 users.

Both the Server and Desktop Editions of NXPowerLite are available to purchase immediately from [www.nxpowerlite.com](http://www.nxpowerlite.com) and all good software resellers. C3 Expo visitors that place an order the show will benefit from free maintenance and upgrades for one year.

## **About Neuxpower Solutions**

Established in 1997, Neuxpower Solutions Ltd is a London-based company that develops bespoke and commercial software to help organizations improve their productivity. Products include NXPowerLite, a hugely successful and highly affordable tool that lets users reduce the size of their presentation files by as much as 95% with no discernible loss of quality.
